

VIR 114

Infectious Bursal Disease (IBD) Freeze Dried Live Vaccine - Virgo 7 strain

Composition

Each dose contains:
Infectious Bursal Disease virus,
Virgo 7 intermediate-hot strain,
 $10^{2.0-2.5}$ EID₅₀.

Indications

Immunization of chickens
against Infectious Bursal
Disease (Gumboro disease).
It may also serve as live virus
primer of replacement pullets
for subsequent vaccination with
inactivated IBD vaccine.

Administration and dosage

Use by instructions of a
veterinarian. Use immediately
after reconstitution with
antiseptic or disinfectant free
drinking water.

Drinking water

- Make sure that drinking water
is free of any traces of
disinfectants.
- Deprive the birds of drinking
water two hours before
vaccination.
- Prepare adequate volume of
drinking water to be
consumed within one to two
hours.
- Protect the dissolved vaccine
from chlorine by adding
Biovac's Blue Neutrachlor®
(following the instructions)
to drinking water to be
consumed within one to two
hours.
- Stir well after mixing and allow
solution to stand for 20 min.
before adding the vaccine.
- Mix well the reconstituted
vaccine in the final volume of
disinfectant-free drinking
water.

- Let the birds consume all the
vaccine-water volume before
renewing water supply.

Ocular route

The vaccine should be dissolved
in physiological saline solution
(usually 40 ml per 1000 doses)
and administered by means of a
standardized dropper.
Administer one drop (0.04 ml) of
vaccine into the open eye of
each bird.

Precautions

- Vaccinate healthy birds only.
- All susceptible birds on the same
premises should be vaccinated
at the same time.
- Use entire content of the vial
when first opened.
- Destroy unused contents and
decontaminate empty vials
before discarding them.
- Keep vaccination records
including vaccine batch number.

Withdrawal period

None.

Storage

Store at 2 -8°C, protected from
direct sunlight.

Presentation

Each box contains: 10 vials of
1000, 2500 or 5000 doses.
